

User Guide

for Magento 2 Facebook Comments extension

Configuration

You can find the extension's settings in Magento admin panel by going to *Stores > Configuration > MagestyApps Extensions > Facebook Comments*:

General Settings

Enable <small>[store view]</small>	Yes	▼
Moderate Comments <small>[store view]</small>	via Facebook Application	▼
Application ID <small>[store view]</small>	1650143761683852	

This gives possibility to moderate comments via your facebook app control panel:
<https://developers.facebook.com/tools/comments/>

Enable - Turn the extension On/Off.

Moderate Comments - Choose the way you want to moderate comments. If you don't want to moderate comments, then choose 'No' option.

Application ID - This setting appears when you select 'Moderate Comments' > 'via Facebook Application' option. Here you need to set the Application ID in which you are going to moderate comments. You can find the App ID here:
<https://developers.facebook.com/apps/>

Admins - This setting appears when you select 'Moderate Comments' > 'via Facebook Account' option. Here you need to set the Facebook account IDs which should be allowed to moderate reviews. To insert multiple IDs, separate them using comma. Here you can find your Account ID: <https://findmyfbid.com/>

Design Settings

Block Position
[store view]

In a separate tab

Color Scheme
[store view]

Light

The color scheme used by the comments plugin.

Number of Comments
[store view]

5

The number of comments to show by default. The minimum value is 1.

Default Order By
[store view]

Social

The order to use when displaying comments. Can be "social", "reverse_time", or "time".

Width of the Plugin
[store view]

The width of the comments plugin on the webpage. This can be either a pixel value or a percentage (such as 100%) for fluid width. The mobile version of the comments plugin ignores the width parameter and instead has a fluid width of 100%. The minimum width supported by the comments plugin is 320px.

Block Position - Choose the place where you want the Facebook Comments block to be displayed.

Tax Class for Payment Fees - Switch the color theme to be used for the plugin. Possible options are 'Light' and 'Dark'.

Number of comments - The number of comments to show by default.

Default Order By - The default sort order to use when displaying comments.

Width of the plugin - The width of the comments plugin on the webpage. This can be either a pixel value or a percentage (such as 100%) for fluid width. The mobile version of the comments plugin ignores the width parameter and instead has a fluid width of 100%. The minimum width supported by the comments plugin is 320px.
